Eunji Ahn

Data Engineer

✉ eunjia@outlook.com | 📞 206-422-8062 | 📍 Redmond, WA

EXPERIENCE

Slalom | June 2022 – May 2023
Intern, Data Engineering | Seattle, WA
- Built end-to-end ETL pipelines for a podcast platform, ingesting on-premise data into optimized relational databases model for engagement analytics and dashboard.
- Implemented data infrastructure to deliver clean, accessible data flows for cross-functional teams, enabling downstream analytics and business intelligence use cases.

Laklara Inc. | May 2023 – Present
IT Manager | Seattle, WA
- Built automated pipelines to extract and standardize trucking pricing and service data from multiple vendor sites into a unified table for cost optimization.
- Designed data infrastructure to deliver processed data to WMS internal server for internal users and front-end apps for external clients

EDUCATION

University of Washington | Sep. 2020 – June. 2023
Informatics | Seattle, WA
- Dean's List from 2020-2023 / GPA:3.87
- Explored the intersection of technology, people, and information through studies in computer science, data science, UX design, and information ethics.

CERTIFICATION

MIT xPRO | March. 2025 – Present
Professional Certificate in Data Engineering
- Learning to build data infrastructure and automate workflows using core skills in data architecture, ETL, big data management, and machine learning.
- Gaining hands-on experience with technologies such as NoSQL, Hadoop, Cassandra, Kafka, NiFi, Flask, Wget, OAuth2, MongoDB, YAML, and more.
